

IDRiM Virtual Workshop (IDRiM2020)

Venue: Online (Zoom)

Dates: 23-24 September 2020

The IDRiM Society has postponed the 11th IDRiM Conference due to the tremendous growth of coronavirus (COVID-19) cases across the globe. For this reason, although we cannot meet physically at our annual conference, we will hold the ***“IDRiM Virtual Workshop for Interactive Discussions between Senior and Early-Career Scientists”*** on ***23-24 September 2020***. We think that it is at times like these that IDRiM Society and all its members should play an important role by promoting integrated disaster risk management.

The ***Integrated Disaster Risk Management Society (IDRiM)*** (idrim.org), an academic society, was founded in 2009 following a series of ten conferences organised by the Disaster Prevention Research Institute (DPRI) and the International Institute for Applied Systems Analysis (IIASA). Since 2009, we have hosted IDRiM conferences annually in different countries around the world showcasing research, implementation cases studies and addressing some of the most pressing problems in the field.

The idea behind the ***“IDRiM Virtual Workshop”*** is to provide a virtual communicative space to promote the exchange of ideas and discussion between well established, experienced scientists and experts who will chair the sessions, and early-career scientists and researchers. Although we would like to create a space for dialogue between senior and early-career scientists, the workshop is open to everyone who is interested and motivated to learn, share ideas, provide comments, and promote IDRiM. The Workshop will also host keynote talks and provide opportunities for discussion.

Keynote Speakers

- Ortwin Renn, IASS, Germany
“The added value of the systemic risk perspective for understanding and governing the COVID-19 crisis”
- Adam Rose, University of Southern California
“The Impact of the COVID-19 on the Economy of the United States”

Outcome

A special thanks to our keynote speakers, Prof. Orwin Renn and Prof. Adam Rose, as well as all session chairs for taking time out of your busy schedule to join this event. Thanks also to all presenters, and participants. It is because of your active participation, excellent presentations and lively discussions that we can say that this IDRiM Virtual Workshop was a complete success. The high number of participants (See below) the diversity of countries and regions, and multi-disciplinary topics highly exceeded our expectations. I learned a lot, and feel energized and motivated to continue working hard for IDRiM and in my own research.

I must say that although we lacked the opportunity to meet face to face, the online event did provide an informal setting which in many ways, at least for me, allowed me to feel at home and to have a personal connection with many of you.

As with all events, I am sure there are things we could have done differently, and that we can improve. We learned a lot from hosting the event and hope that if we hold future online events, we can do better. For example, I think it would be great to add the possibility of one to one or small group interactions. If you have comments or suggestions, please do send them to us. They will be very helpful.

The total number of restoration was	248
The number of region/country was	38
The number of session was	24
The number of presentation was	97 + 3 absents
