

Emergency Management <?> Risk Management **(<?> Disaster Management)**

IDRIM Cafe talk
30 June 2021

Charles Scawthorn
Pacific Earthquake Engineering Research Center
University of California at Berkeley

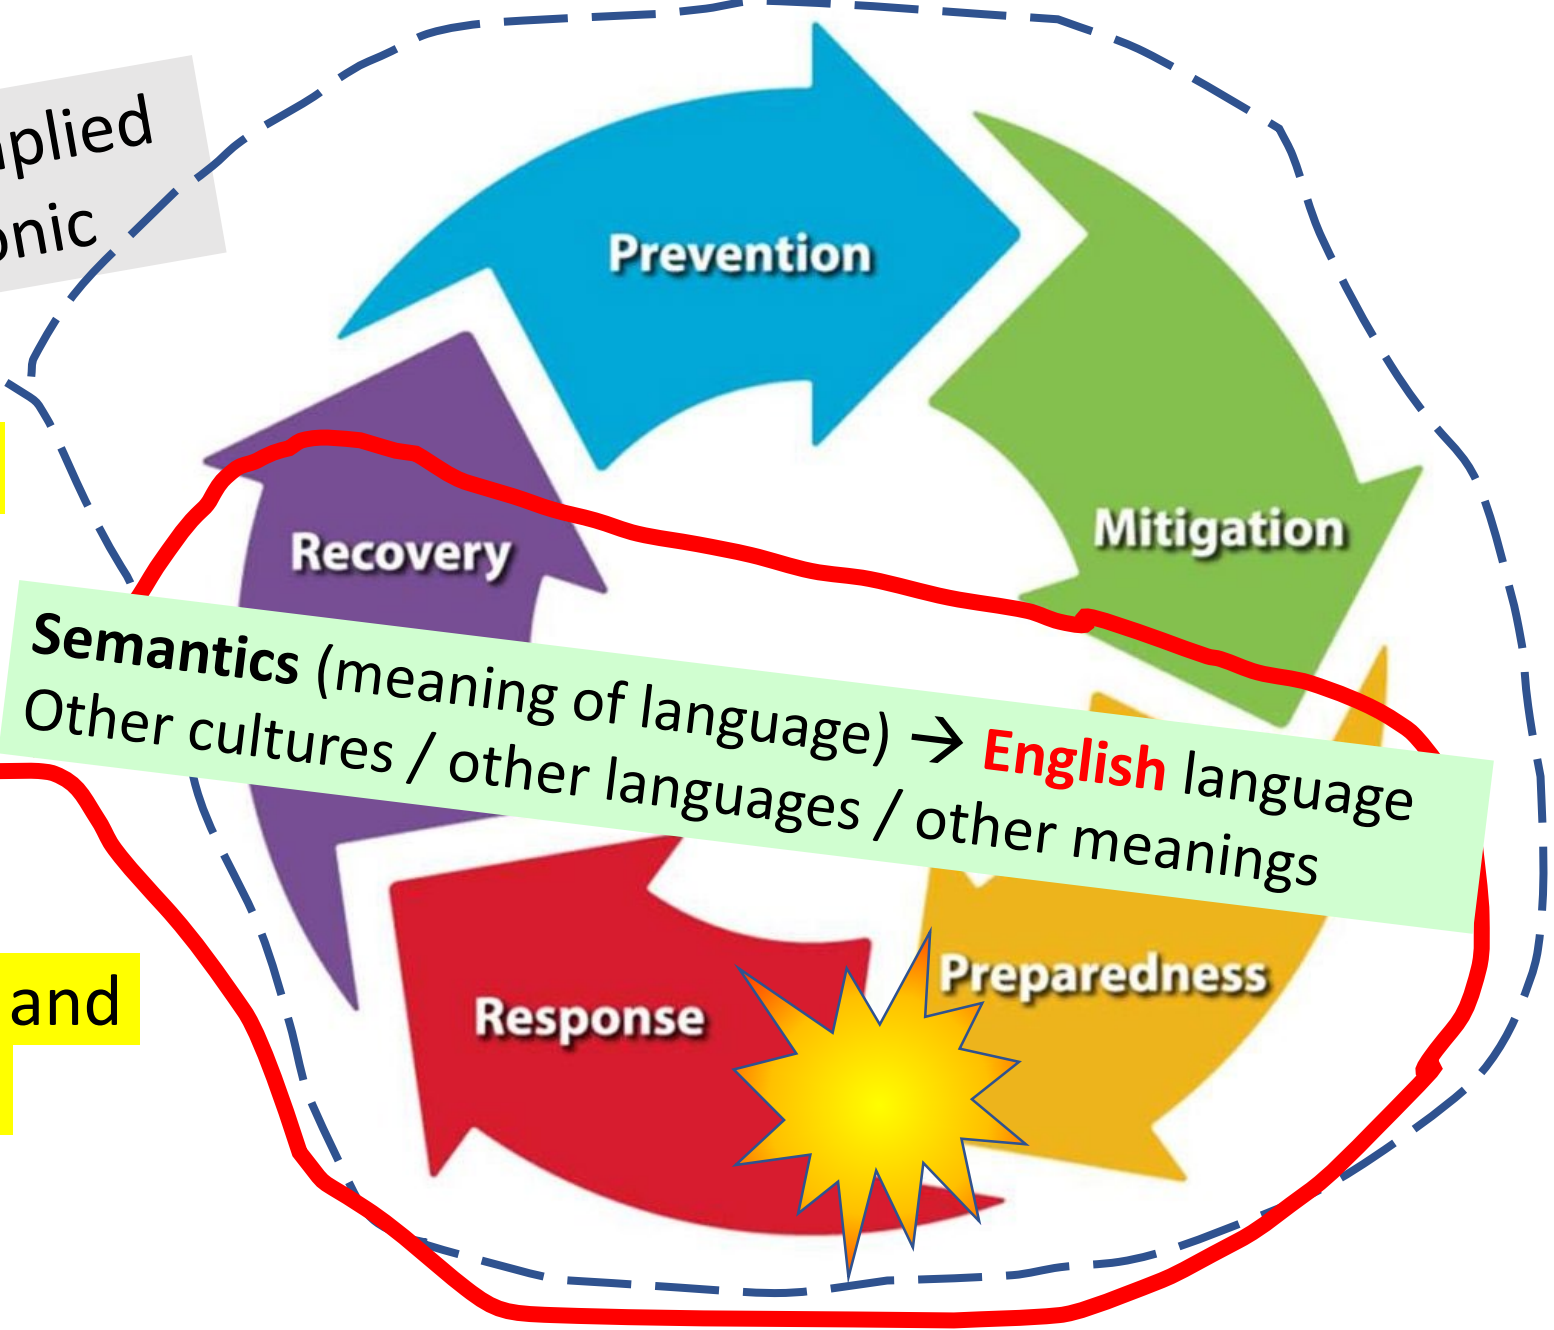

No time implied
→ Chronic

Risk: The possibility of something bad happening

Emergency: something dangerous that happens suddenly or unexpectedly and needs fast action

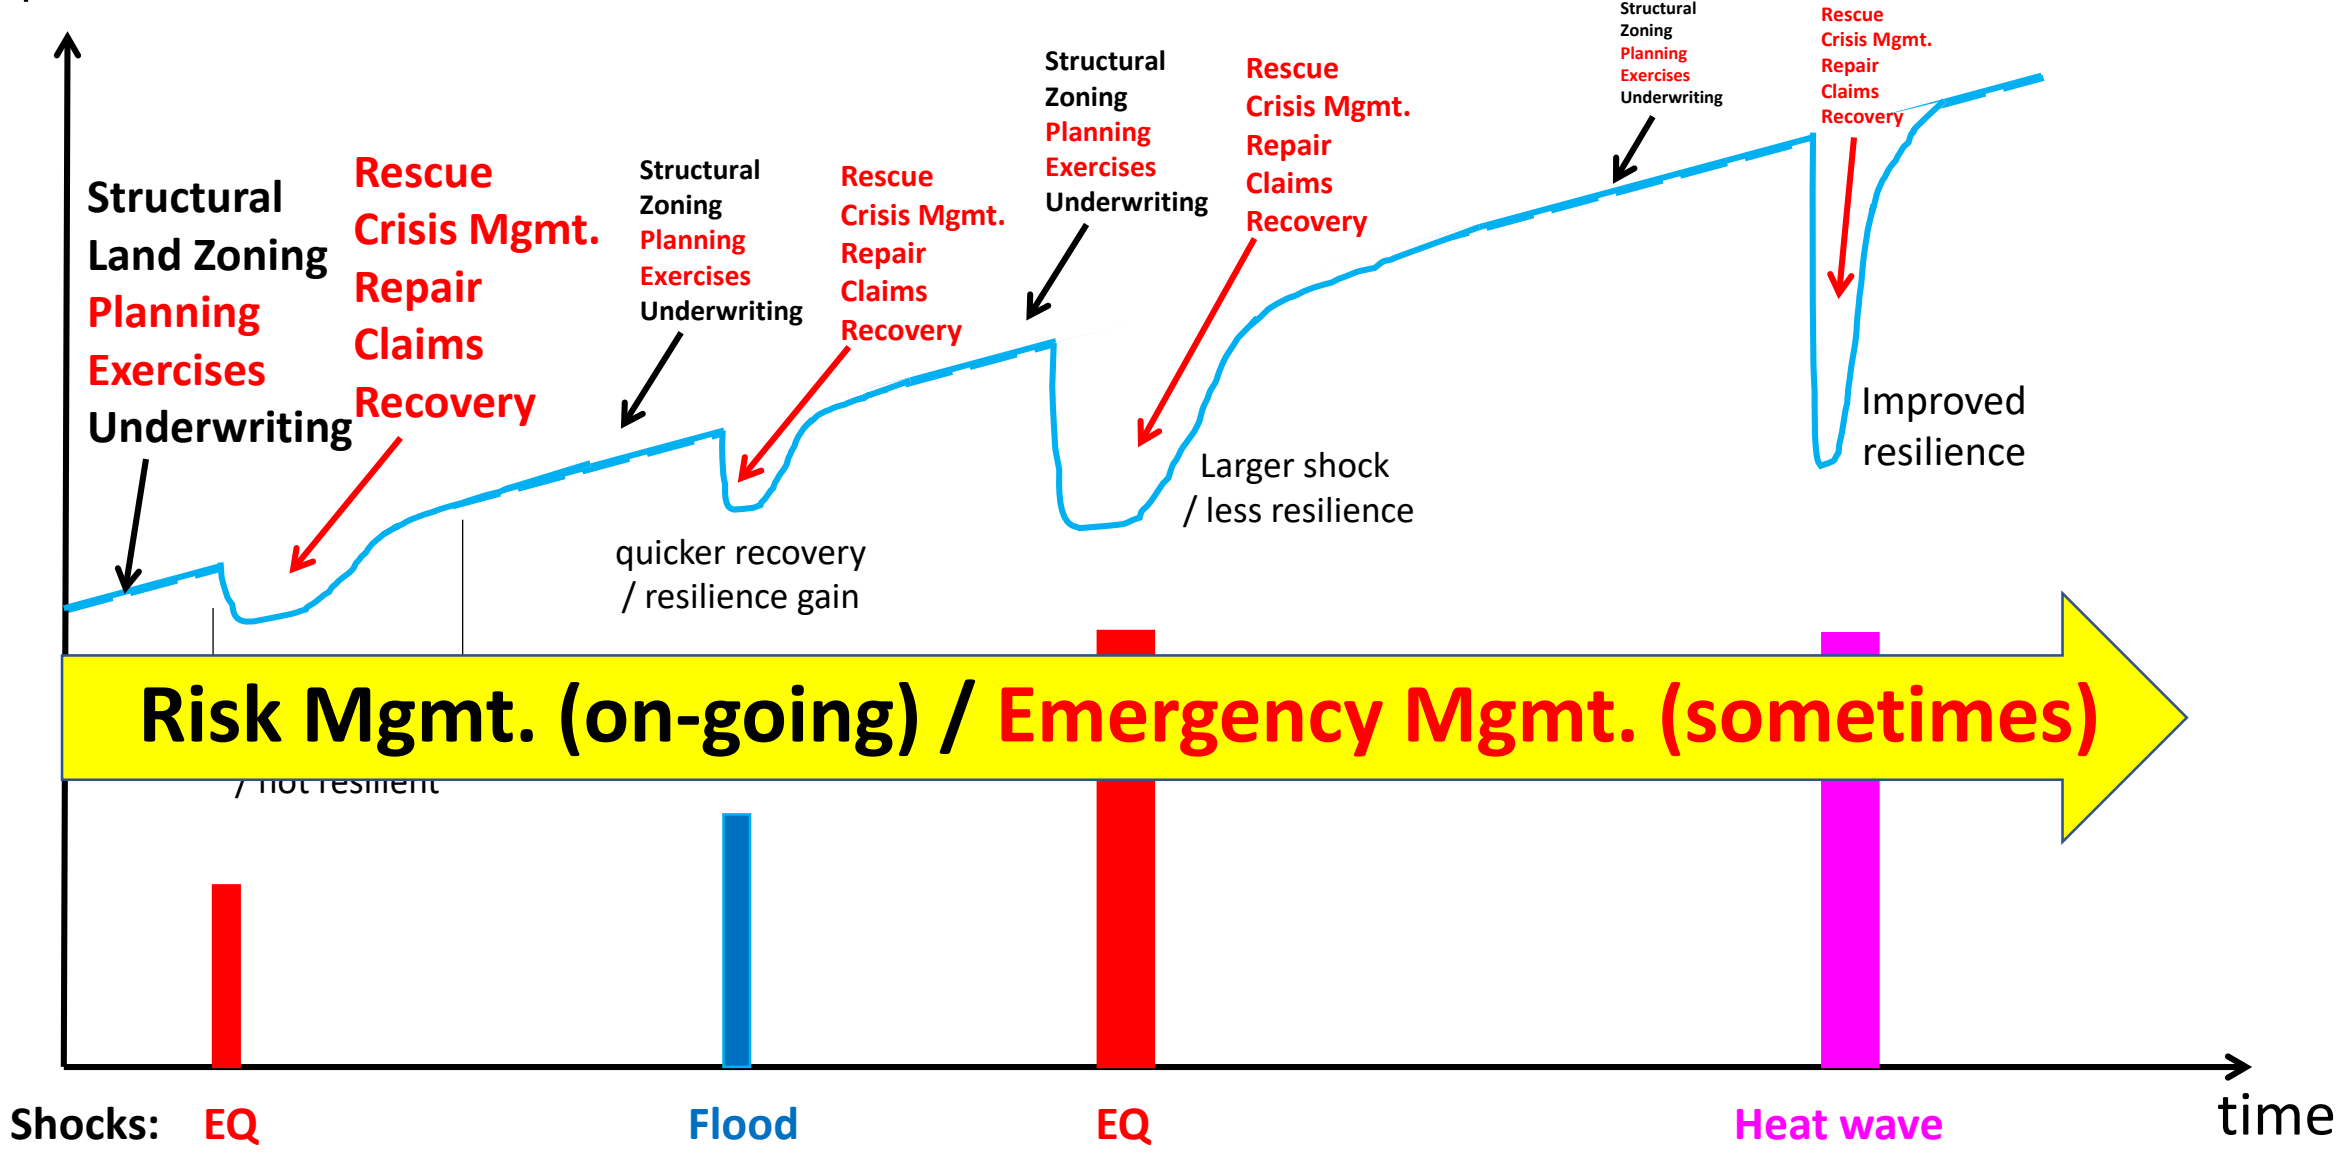

Management: the control and organization of something

Semantics (meaning of language) → English language
Other cultures / other languages / other meanings

Measure of growth
(population, GDP...)

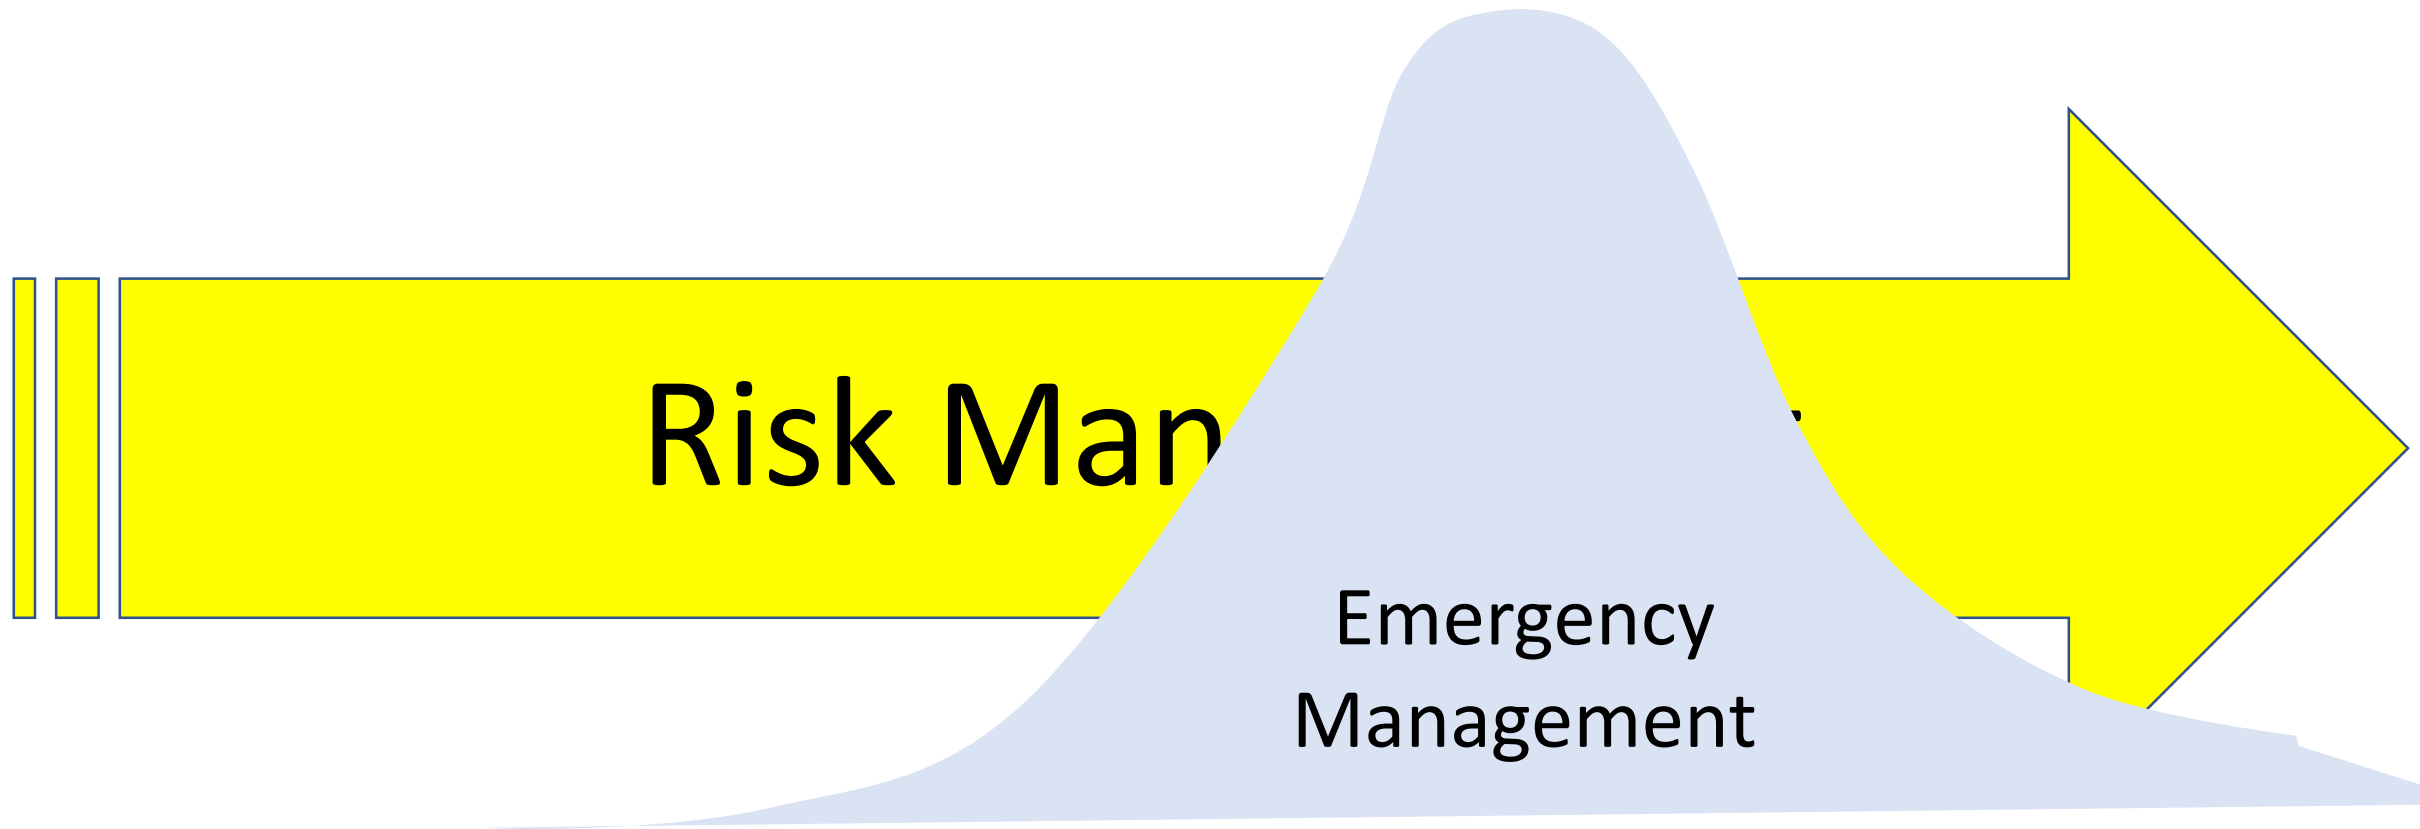

Managing / Reducing Risk: 4 methods

Structural

Locational

Operational

Risk Transfer

How to interpret Emergency Management within an IDReM Society?

SOCIETY

Religion

Art

Leisure

Production

Transportation

Communication

Education

Housing

Health
