Anticipatory governance and disaster risk management from a local and regional perspective

(EU; Aug 2024)

This [European Committee of Regions](#) report examines the development and enhancement of *anticipatory governance approaches* for disaster risk management and adaptation by local and regional authorities, with a primary focus on extreme weather events and climate-related disasters. It offers an overview of *regional vulnerabilities* across Europe and draws *lessons* and best *practices* from local governments that have successfully recovered from past disasters and bolstered their resilience through the UNDRR's "*building back better*" principle.
